DETAILED ACTION

Election/Restrictions

- 1. Claims 44-48 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9-25-2007.
- 2. While applicant elected species A, drawn to claims 29-43 and 46-56, examiner has withdrawn claims 46-48 because applicant has no disclosure of a Raman amplifier that is co- and counter- pumped.
- 3. Applicant's election with traverse of claims 29-43 and 49-56 in the reply filed on 9-25-2007 is acknowledged. The traversal is on the ground(s) that:
 - A. On page 1, that "The Examiner did not identify any pending claims in either of these two identified claim groups."
 - B. On page 2, that "the Examiner has not established that claims in Groups A and B are independent or distinct."
 - C. On page 2, that "examination of dependent claims 44 and 45 (i.e., Group B) would not impose any serious additional burdens on the Examiner."
 - D. On page 3, that "claim 29 is a 'linking claim'".
- 4. This is not found persuasive because:
 - Argument A is unconvincing, identifying claims beforehand is not a requirement
 of a proper election requirement.

Application/Control Number: 10/568,080 Page 3

Art Unit: 3663

Argument B is unconvincing, a proper traversal of examiner's allegation of
distinctness would be to say that "the species are indistinct and obvious over one
another."

- Argument C is unconvincing, searching both types of third stage is a serious burden.
- Argument D is unconvincing, claim 29 is not a linking claim, it is a generic claim.
 In any case however, claim 29 is not yet allowable, nor is it certain if claim 29 will remain generic throughout prosecution.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Application/Control Number: 10/568,080 Page 4

Art Unit: 3663

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

- 8. Claims 29-36, 38-40, 43, 50-53, and 55-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Evans (USP No. 6310716) in view of Ohishi et al. (USP No. 2002/0080474).
 - Regarding claim 1, Evans discloses a multi-stage optical amplifier to amplify a transmission signal Including a signal wavelength comprising
 - o a first amplifying stage including a rare-earth doped optical active fiber;
 - o a second amplifying stage connected to said first amplifying stage, said second amplifying stage comprising an active fiber doped with a rare earth element; and
 - a third amplifying stage connected with said second amplifying stage, said
 third amplifying stage including a silica-based fiber

but fails to disclose the second stage being tellurite-based. Evans does however teach placing any two stage amplifier in place of module 30A and 30B. Ohishi

Application/Control Number: 10/568,080 Page 5

Art Unit: 3663

teaches a two stage amplifier with a first silica-based EDF 204 and second tellurite EDF 205 [Fig. 31]. Therefore, it would have been obvious to one skilled in the art (e.g. an optical engineer) at the time the invention was made, to use the tellurite EDF of Ohishi, for the advantage of having longer meta-sable states provided by tellurite EDF's.

- Regarding claim 30, Evans discloses [Fig. 1].
- Regarding claims 31-32, Evans discloses an L-Band lower path in figure 1.
- Regarding claims 33-36 and 38-40, Ohishi discloses [Fig. 31] and [¶ 0421- 0433].
- Regarding claim 49, Evans discloses [Abstract].
- Regarding claim 50, Evans discloses [Col. 5, line 23]
- Regarding claim 51, Evans discloses [Fig. 1, #22A]
- Regarding claim 52, Evans discloses [Fig. 1, #22 24 25 24A 18]
- Regarding claim 53, Evans discloses [Claim 6].
- Regarding claims 55 and 56, Evans discloses [Fig. 1, #20B]
- 9. Claims 37 and 41-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohishi and Evans as applied to claims 29-36, 38-40, 43, 50-53, and 55-56 above, and further in view of official notice. Ohishi and Evans disclose the invention with all the limitations of claims 29 and 35, but fail to disclose double pumping an EDF stage or pumping at 980 nm. Official notice is taken that co- counter- and double-pumping an EDF with 980 nm, 1480 nm or both is well-known in the art, each strategy having advantages that are well-known in the art. Therefore, it would have been obvious to one

Art Unit: 3663

skilled in the art (e.g. an optical engineer) at the time the invention was made, to modify the pumping schemes of Ohishi or Evans, for the advantage of better control of the gain spectral profile.

10. Claim 54 is rejected under 35 U.S.C. 103(a) as being unpatentable over Evans and Ohishi as applied to claims 29-36, 38-40, 43, 50-53, and 55-56 above, and further in view of Evans. Ohishi and Evans discloses the invention with all the limitations of claim 29, but fail to explicitly disclose a GFF between the Raman and EDF stages. Evans does teach that a GFF can be placed between the two EDF stages, and thereby implying a benefit to GFF's between amplifying stages [Col. 5, lines 47-50]. Therefore, it would have been obvious to one skilled in the art (e.g. an optical engineer) at the time the invention was made, to place a GFF between the DRA and EDFA of Evans, for the advantage of smoothing the gain spectral profile.

Conclusion

- 11. The references made herein are done so for the convenience of the applicant. They are in no way intended to be limiting. The prior art should be considered in its entirety.
- 12. The prior art which is cited but not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3663

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ari M. Diacou whose telephone number is (571) 272-5591. The examiner can normally be reached on Monday - Friday, 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Keith can be reached on (571) 272-6878. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
